# Business Management System

As we all know that the business of transport is extremely wide and versatile, there is a need to transform the ways of controlling such huge businesses. In the modern world, when everyone has shifted towards the digital means and platforms for conducting business, a large chunk of the population in

It is a trend of the market that one who moves under the changing market trends and copes up with the technological advancements gets higher return than others who don't comply with the transforming nature of the market. India still relies on the traditional means of doing operations of a business.

Bharat Software Solutions is a leading name in the software and digital sector. The company has been operating across the country and providing digital solutions for many years. Bharat Software has a huge partner base of over 1450+ clients that have trusted us. We provide effective and cost-effective Transport Management Software to businesses of different sizes.

We provide all kinds of technical support to businesses that are engaged in providing commercial truck & logistics services. Our team of experienced and qualified professionals is continuously putting their best to provide modern transport management system so that the owners and operators can handle various tasks in few clicks.
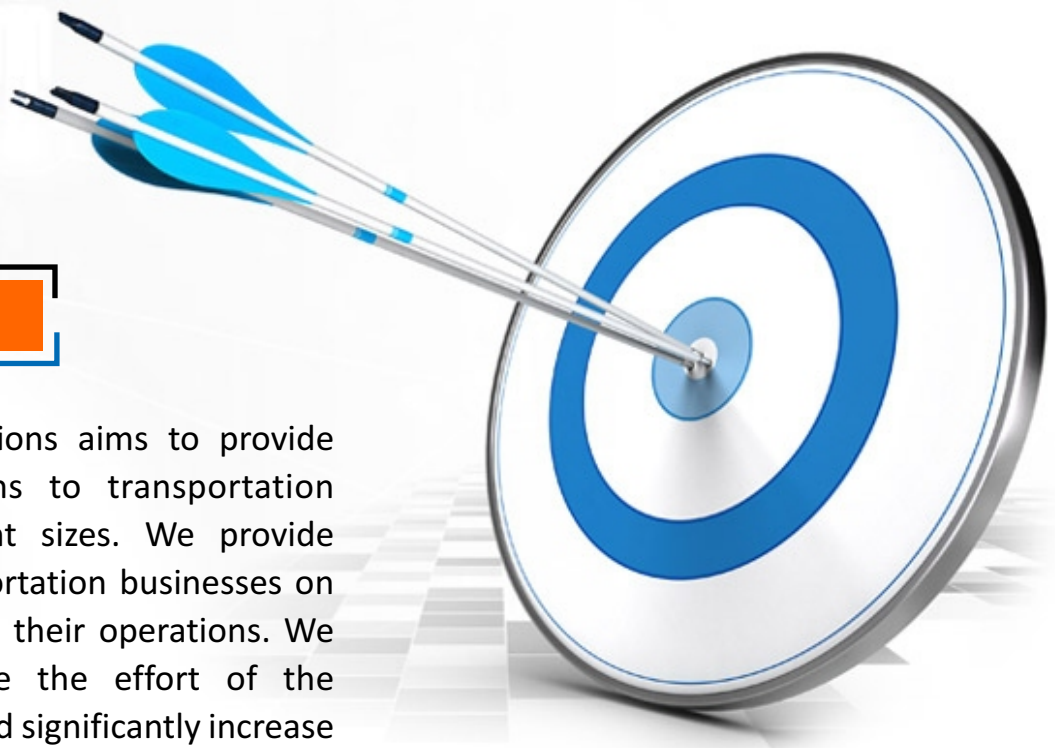

## About us

We are one of the established software providers across the country and have managed to make our mark by providing quality and selfless services for the last 13 years. These years have been a remarkable journey for the company as it significantly grew across India. We are a unit of Bharat Group that is currently among the reputed service providers. One of the oldest in the business, Bharat Software has always shown an inclination towards its clients by focusing on the quality of our services.

Bharat Software, a Delhi-based company, has managed to achieve several recognition and awards in the field of technology and online solutions. Our background, as well as the quality of services, are the primary reasons that a large number of businesses today rely on us. Therefore, it becomes our duty to provide our selfless commitment towards our clients and work to achieve new heights.

The company began its journey years back intending to provide great services to this country and started with offline software. When the use of computers was prevalent in India, the company saw potential and invested its ideas into it by providing offline solutions so that the operators could maximize their returns. Now, when the presence of the internet can be seen in every part of the country, we have successfully developed software that will work on the lines of the internet. Therefore, changing ourselves according to the transforming world was one key aspect of our

## Our Mission

# PRODUCT

## Transport Management System

One of our primary products, the transport management system has managed to acquire a huge client base pan-India and is genuinely helping out the business operators to have a great command over their different operations. Transport Management Software can help in assisting the operator in many special ways. As the transportation businesses involve a great number of vehicles, it becomes challenging for the owner/operator to manage them

Another great application of the software is that it helps in managing the accounting part of these businesses. One can easily keep track/details of the cash payments, online transactions, etc. It also makes provision through which the payroll of a company can be managed, i.e. salaries, other costs, etc. can be managed. Transport Management Software promotes the culture of minimum input &
